DETAILED ACTION

1. In view of the appeal brief filed on 01/20/2004, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2). Claims 10 and 12 are present in the application, claims 11, 14, 15 and 18 are withdrawn, and claim 17 is cancelled as set forth in the appeal brief 01/20/2004.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fritz et al (3,687,269), hereafter Fritz. Fritz discloses power actuated strip feeder means 150, 156, 157,

Art Unit: 3724

326, 327, 328; linear transit path shown in figure 15 from left to right; strip shaping means 32, 35, 33, 34; shaping devices 32, 35, 33, 34; stations 32, 35, 33, 34. The shaping means is capable of cutting rectangular shaped tread strips.

4. Claims 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Busch (3,710,836). Busch discloses power actuated strip feeder means 180, 188, 62, 68; linear transit path from right to left in figure 1; strip shaping means 124. The shaping means is capable of cutting rectangular shaped tread strips.

5. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Schoendelen (1,578,854). Schoendelen discloses power actuated strip feeder means 29, 47, 48, 35; linear transit path collinear with an imaginary line connecting shaft 33 and shaft 44 in figure 1; strip shaping means 49 and 51. The shaping means is capable of cutting rectangular shaped tread strips.

Response to Arguments

Applicant's arguments with respect to claims 10 and 12 have been considered but are moot in view of the new ground(s) of rejection. It is to be noted that the claims are limiting the structure of a cutting apparatus, but not limiting the structure of the tread strips that are cut by the apparatus. The limitations concerning the tread strips is merely the intended use of the apparatus and does not prevent an apparatus capable of performing the same functions from being referenced as prior art. Note MPEP 2106 regarding intended use.

Conclusion

Art Unit: 3724

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
